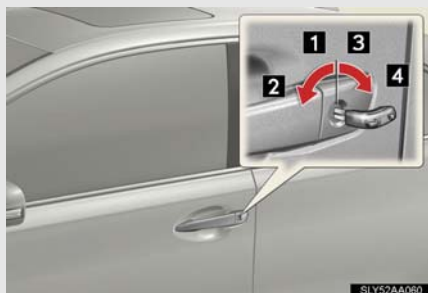
*: It also comes on due to natural causes such as natural air leaks and tire inflation pressure changes caused by temperature. Adjust the tire inflation pressure.

If the electronic key does not operate properly

n Unlocking and locking the doors


Use the mechanical key in order to perform the following operations (driver’s door only):

1 Locks all the doors

2 Closes the windows and moon roof (turn and hold)*

3 Unlocks the door
Turning the key rearward unlocks the driver's door. Turning the key once again unlocks the other doors.

4 Opens the windows and moon roof (turn and hold)*

*: This setting must be customized at your Lexus dealer.

n Starting the hybrid system

1. Depress the brake pedal.
2. Touch the Lexus emblem side of the electronic key to the “POWER” switch.

   If any of the doors is opened or closed while the key is being touched to the switch, an alarm will sound to indicate that the start function cannot detect the electronic key.
3. To change “POWER” switch modes: Within 10 seconds of the buzzer sounding, release the brake pedal and press the “POWER” switch. Modes can be changed each time the switch is pressed.

   To start the hybrid system: Press the “POWER” switch within 10 seconds of the buzzer sounding, keeping the brake pedal depressed.

In the event that the hybrid system still cannot be operated, contact your Lexus dealer.

If the electronic key battery becomes depleted, replace it with a new battery. For instructions on replacing the battery, refer to the Owner's Manual. If you need further assistance, contact your Lexus dealer.

If the hybrid system doesn't start

Make sure that the correct operating procedures have been followed.

Brake pedal

Make sure that the brake pedal is firmly depressed when attempting to start the hybrid system.

If the hybrid system still does not start, see the Owner's Manual for more information or contact your Lexus dealer.
